Retractable screens for

DOORS | WINDOWS | LARGE OPENINGS

PHANTOM™ SCREENS

Outdoor living, indoor comfort

Top left: Double door screens are ideal for conservatories keeping them cool and insect free.

Top right: Pull across screens work well in bedrooms to stop you getting bitten at night.

Bottom left: Pull down screens can be used to cover more than one window simultaneously.

Bottom right: Single door screens allow you to access outdoor areas while keeping insects at bay.

Let fresh air in and keep insects out

PressFit screens are designed to perfectly match white uPVC doors and windows and give you maximum insect protection without the need for screws. The screens simply stick to your window or door frame using pre-attached adhesive strips.

The cassette frame of the screen creates a complete seal so there are no gaps around the edges where insects can enter and the retractable design means that the mesh is protected and kept out of sight when not in use. Screens can be pulled across or down to suit your opening and feature spring and lock adjusters so the mesh always stays taut.

FEATURES

No screws – sticks securely to frame so there is no drilling required.

No gaps – cassette frame stops all insects unlike chains and curtains.

Discreet – white uPVC housing blends in with frame.

Durable – retractable design protects mesh from wear and damage.

Fit and forget – retracts out of sight but is there when you need it.

Versatile – can be fitted to windows, doors or double doors.

Always taut – spring lock adjuster ensures mesh remains taut.

Smooth action – tension lock adjusts recoil so screens retract smoothly.

Made-to-measure – screens are cut to size for a perfect fit.
