PHANTOM  
SCREENS™

*Top left: Screens can be fitted to external structures to protect outdoor areas.*

*Top right: Higher density fabrics provide privacy from the outside in.*

*Bottom left: Provides insect protection and solar shading without obscuring your view.*

*Bottom right: Screens and tracks can be fully recessed for a clean, contemporary look.*

# Luxury outdoor living

Phantom's Executive motorised screens let the sights, sounds and smells of the outdoors in whilst protecting against insects, UV rays, autumn foliage and even light rain showers.

The screens can be fitted to windows and large openings to let the best of the outdoors in or to porches, patios and other exterior structures to protect outdoor areas and expand your living space. Solar mesh screens can even be used in conjunction with patio heaters to allow you to continue enjoying outdoor spaces when temperatures start to drop.

Executive screens also feature a Smart Stop system, which automatically stops the screen if there is an obstruction.

## FEATURES

- Open and close at the touch of a button.
- Optional sun and wind detectors automatically adjust screen position.
- Can be linked to home automation system.
- Fully recessed option available.
- Low profile housing blends in with your existing door/window frame.
- Fitted with durable mesh and zip technology to hold screen securely in place
- Mechanical components covered by Phantom Two-Year Warranty.

## PERFORMANCE FABRICS

Executive screens can be fitted with a range of technical fabrics to suit your requirements including standard and anti-midge insect meshes, solar shading and privacy/blackout fabrics.
